Health Ministry Uses Traffic Lights Colour Code to Map Country's COVID-19 and Virus-free Zones

According to the latest data from the Union Health Ministry, the colour code- Red, Orange, Green- will now be used on the country's map to highlight COVID-19 and virus-free zones. The government has decided to divide all districts across the country into three zones including hotspots (red zone), non-hotspots (orange zone) and green zones.

Red Zone – Any district reporting more than six cases would be classified as hotspot district or red zone.

Orange Zone – Districts where new cases are emerging or showing a sign of decline has been classified as non-hotspots or orange zone

Green Zone – Districts not reporting any cases across the country has been classified as Green zone.

So far the government has identified 170 hotspot districts, 207 non-hotspot districts and 359 green zone. This number may decrease or increase as per the situation.

Government launches Dashboard 'COVID Warriors' Containing Details of Healthcare Professionals and Volunteers for combating Covid-19

The Union Government has launched an online portal <https://covidwarriors.gov.in> which consists of details of AYUSH doctors, nurses and other health care professionals, volunteers from NYKs, NCC NSS, PMGKVY, ex Servicemen etc. The dashboard contains state wise and district wise availability of the large pool of human resources from various groups along with contact details of the nodal officers, in order to help in combating and containing COVID-19.

Pune-based Researchers Develop 'bug sniffer' for efficient detection of pathogens

A team of researchers at the Agharkar Research Institute (ARI), Pune have developed a sensitive and low-cost sensor called 'bug sniffer' to rapidly detect bacteria.

ARI is an autonomous institute under the Department of Science & Technology, Govt. of India. The portable device can detect as low as ten bacterial cells from a

sample size of one milliliter in just 30 minutes. The biosensor device uses synthetic peptides, magnetic nanoparticles, and quantum dots to detect the presence of bacteria. It provides cost- and time-effective way of screening water and foodborne pathogens.

China begins testing of digital currency – DC/EP

People's Bank of China (Central Bank of China) has started testing its digital currency named Digital Currency Electronic Payment, DC/EP. It is built with Blockchain and Cryptographic technology. The currency is pegged 1:1 to the Chinese National Currency – the RenMinBi (RMB). China's official digital currency is undergoing testing and has not been officially released.
